Restrictions

A customer must also not switch any portion of their local service to another provider, block service or discontinue their service during the period covered by their term of service commitment.

A customer who has ordered a term of service commitment but who discontinues service before expiration of agreed upon term must pay a termination amount equal to the prior 12 months of credit, or if termination occurs before the end of 12 months, equal to the total credit applied to their account under this plan.

The customer may discontinue a term of service commitment prior to the expiration of the applicable term without liability when notice of the cancellation is received before the due date of the order for their term of service commitment. Discontinuance of service occurs when a customer is terminated by GCI for non payment or when the customer notifies GCI that the business is no longer doing business within the GCI Serving Area.

Telephone number changes for the same business in the same or different location will result in a transfer of the term commitment agreement to the new telephone number or new location.

FOR NEW SIGN UPS.      4.5 (N)

Business Customers who sign up for Company-provided local service and sign up for a DSS circuit and a Block of 100 Numbers may subscribe to this Denali Summit for Business Plan.

Reference

8.1 RATES AND CHARGES (Cont'd)

8.1.4 METRO ETHERNET

5.7.1 (C)

Term Commitment - *Metro Ethernet* is subject to a minimum term commitment of 1-year and is available for extended term services of 2, 3, 4 and 5-years. At the end of the initial customer term, the customer has 60-days to select an additional term commitment, or may choose month-to-month rates. If the customer does not enter into a new term of service commitment at the conclusion of the 60-day period they will be charged the month-to-month rates.

(C)

Additions - After the initial order a customer may elect to add additional ports to an existing *Metro Ethernet* network. Any such order for additional ports will be subject to a minimum term commitment of 1-year.

(C)

Network Access Port Charges – Port charges are assessed based on the total number of ports the Customer selects for the term commitment. If a Customer adds ports after the initial order, and that purchase results in eligibility for a lower overall port price, the port prices will be adjusted downward on the next monthly billing after the additional port is in service.

8.1 RATES AND CHARGES (Cont'd)

8.1.4 METRO ETHERNET (cont'd)

Tariff  
Reference (C)

Early Termination of Term Commitment – Early Termination of Term Commitment - If a Customer terminates a term of service prior to the end of the commitment period, the Customer is responsible for the following early termination charges:

5.7.1

a. The difference between the rate paid, and the rate for the term of service actually completed. (If a term commitment is terminated in the middle of a period the rate used to assess this charge will be the rate for the closest term actually completed.)

b. The difference calculated above multiplied by an early termination finance charge of 9.9%, compounded annually. For instance a customer agrees to a three-year term --- but only completes 1-year of service. The penalty would be calculated by taking the difference between the three year rate and the one-year rate for one year x 9.9% early termination finance charge.

Reduction in Number of Ports of Total Backbone Bandwidth – If a customer reduces either the total number of ports, or total backbone bandwidth below 70% of their initial service agreement, the terminated ports will be considered an early termination and subject to the charges outlined in the Early Termination of Term Commitment section. Remaining ports will be subject to re-rating based on the total number of remaining ports.

Increase in Number of Ports or Total Backbone Bandwidth - A Customer may add additional ports to an existing agreement. Those ports will be rated at either; the applicable rate for the term of service expected (For example a customer adds a port 1-year into a current 4-port agreement with a term of three years.) The customer would be eligible for a 2-year term rate for the additional port, or they may enter into an agreement for a shorter or longer term of their choosing. If a term is chosen that ends concurrently with the current term, or is longer than the current term the entire agreement would be subject to re-rating, if applicable, based on the overall number of ports from the original configuration, plus the additional ports chosen.

3. Underground Construction in Subdivisions in Advance of Service

Types of Subdivisions - Where underground distribution plant would normally be provided at the option of the Utility, no construction charges are applicable.

Subdividers and developers frequently request the installation of underground distributing plant and service entrances where aerial plant would normally be provided by GCI, in subdivision in advance of telephone service. In connection with such requests, subdivisions are generally classified as follows:

Type 1 - Subdivisions that are laid out and houses built on every lot by the developer on a mass production basis.

Type 2 - Subdivisions that are laid out by the developer, who builds houses on a few select lots or sells lots to prospective owners or contractors.

Type 3 - Subdivisions that are laid out by the developer and lots sold individually to prospective owners or contractors.

In all three types of subdivisions, the subdivider or builder must agree to:

- a. Furnish rear and side lot easements as required, and
- b. Provide a semi-finished final grade for the entire width and length of the easement at such time as it is necessary to install the distributing cable, and
- c. Subdivider or developer digs and backfills trenches for distribution cable and all service entrances. All trench and backfill requirements will be at no cost to the Utility (applies to Type 1 and 2 subdivisions only), and
- d. Adhere to the provisions of the National Electrical Safety Code and Utility specifications.

In subdivisions of Types 1 and 2, the subdivider or builder must agree to provide a semi-finished final grade from the distribution cable to each foundation or house built by the subdivider at such time as the service entrance is to be installed. Should the semi-finished final grade provided ultimately prove to be unusable, the subdivider or builder will provide any and all changes to the original grade, at his expense.

In some instances the Municipality may enter into a “Subdivision Agreement” with the developer covering all utilities i.e. water, sewer, electric and telephone. In these cases the terms of the “Subdivision Agreement” will govern the installation of the Utility’s facilities.
